

English

Tower to the Sun

This fantastic book looks at a world in the future where pollution has caused the whole Earth to look very, very different...

Way Home

A young boy is determined to keep a cat as a pet; he spends time trying to get to know him and show him how to belong.

Maths

Maths will continually develop children's skills in reasoning and problem solving through challenging questioning in areas including number, data, measure and geometry. Children will learn valuable skills in real life contexts.

Music

Children (and teachers!) will be working with the Redbridge Music Service to learn the violin for this term.

PE – The children will be continuing to look at dance and working with the fantastic 'Little Runners' for outdoor PE net games.

YEAR 4

Science

States of Matter

In the first half of Spring we will be looking at solids, liquids and gases and the different ways you can change between them through exciting practical experiments!

Sound

Children will be exploring how sound works; how do our ears pick up sound? What causes sounds to be loud and quiet? All these questions will be answered!

PSHE

Money matters

We will be exploring real life examples of budgeting, saving and paying for goods.

Who likes chocolate?

This unit will look at the power of adverts and consumer marketing.

Computing

Lego Wedo – making animals move through programming and iMovie to make short animations.

RE

Our unit entitled 'How do believers show commitment through the journey of life?' will focus on different religions and their milestones.

History and Geography

History

Our History unit will explore the ancient Mayan civilisation and their impact on modern society.

Geography

This unit will focus on comparisons between the UK and Mexico, linked to the Mayan people.

Art/DT

In Art we will be looking at the work of Frida Kahlo and recreating our own versions of her work.

In DT we will be completing a unit on food, looking at safety, market research and product packaging.
