

Art WB 8.6.20

David Hockney: Landscapes

I can observe an artists work and re-create a section.

David Hockney's most recent work has been done using an iPad.

This increased since lockdown where he has been in his house, looking out of the windows.

Over the following slides, you will see a selection of
David Hockney's work.

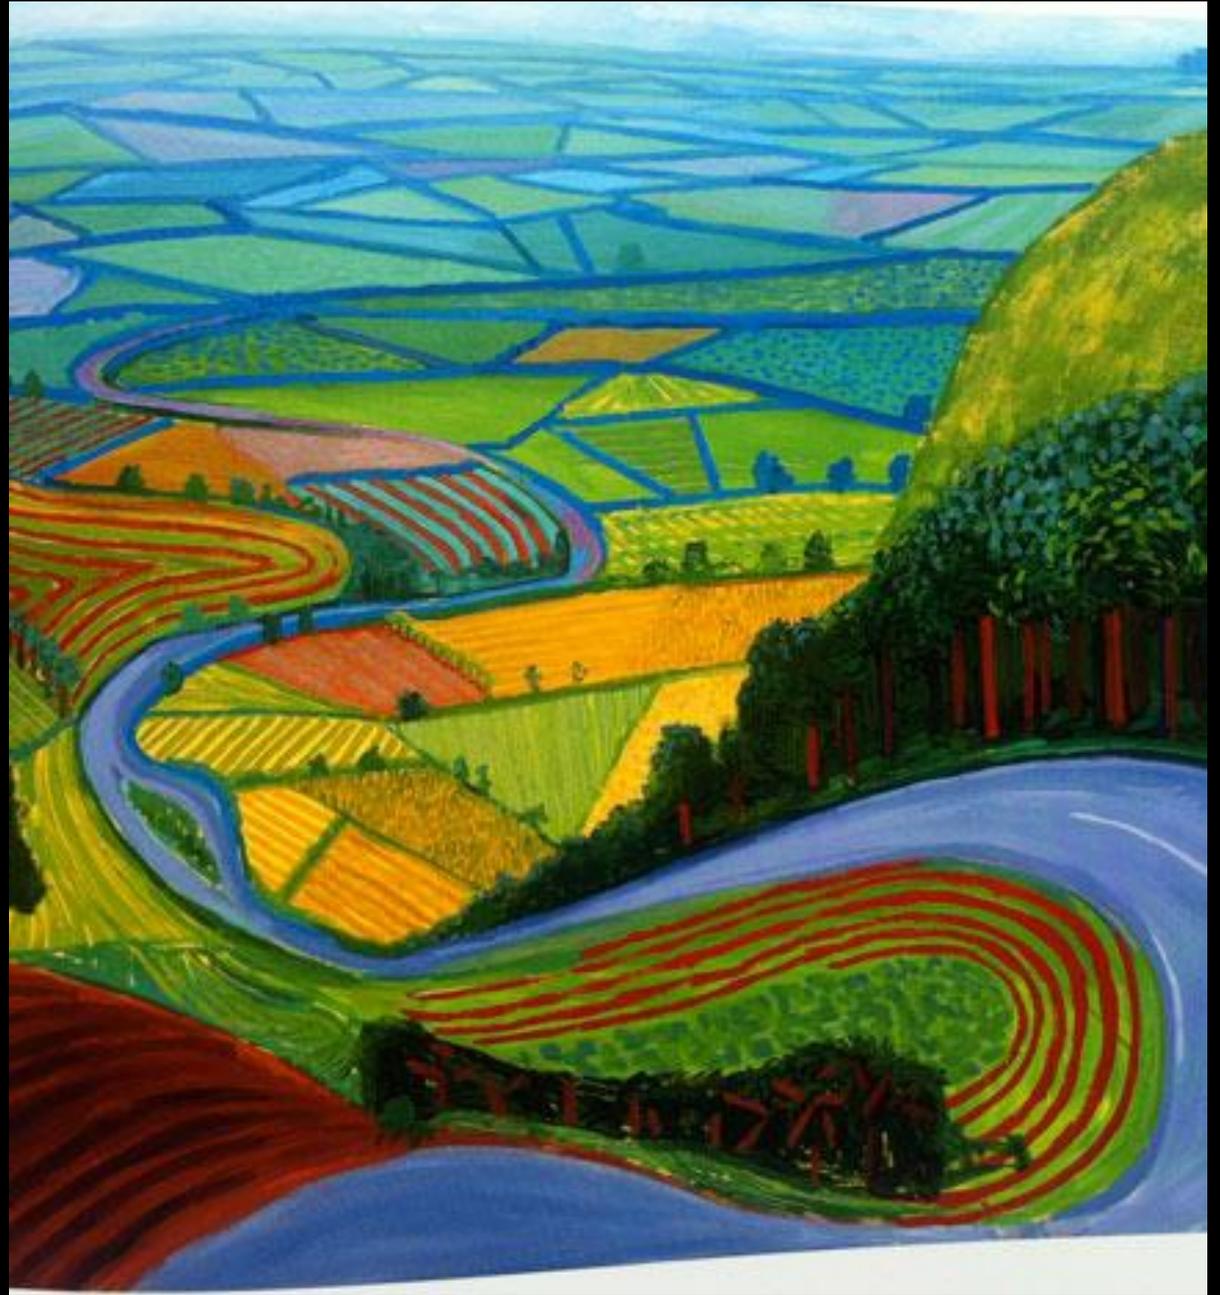

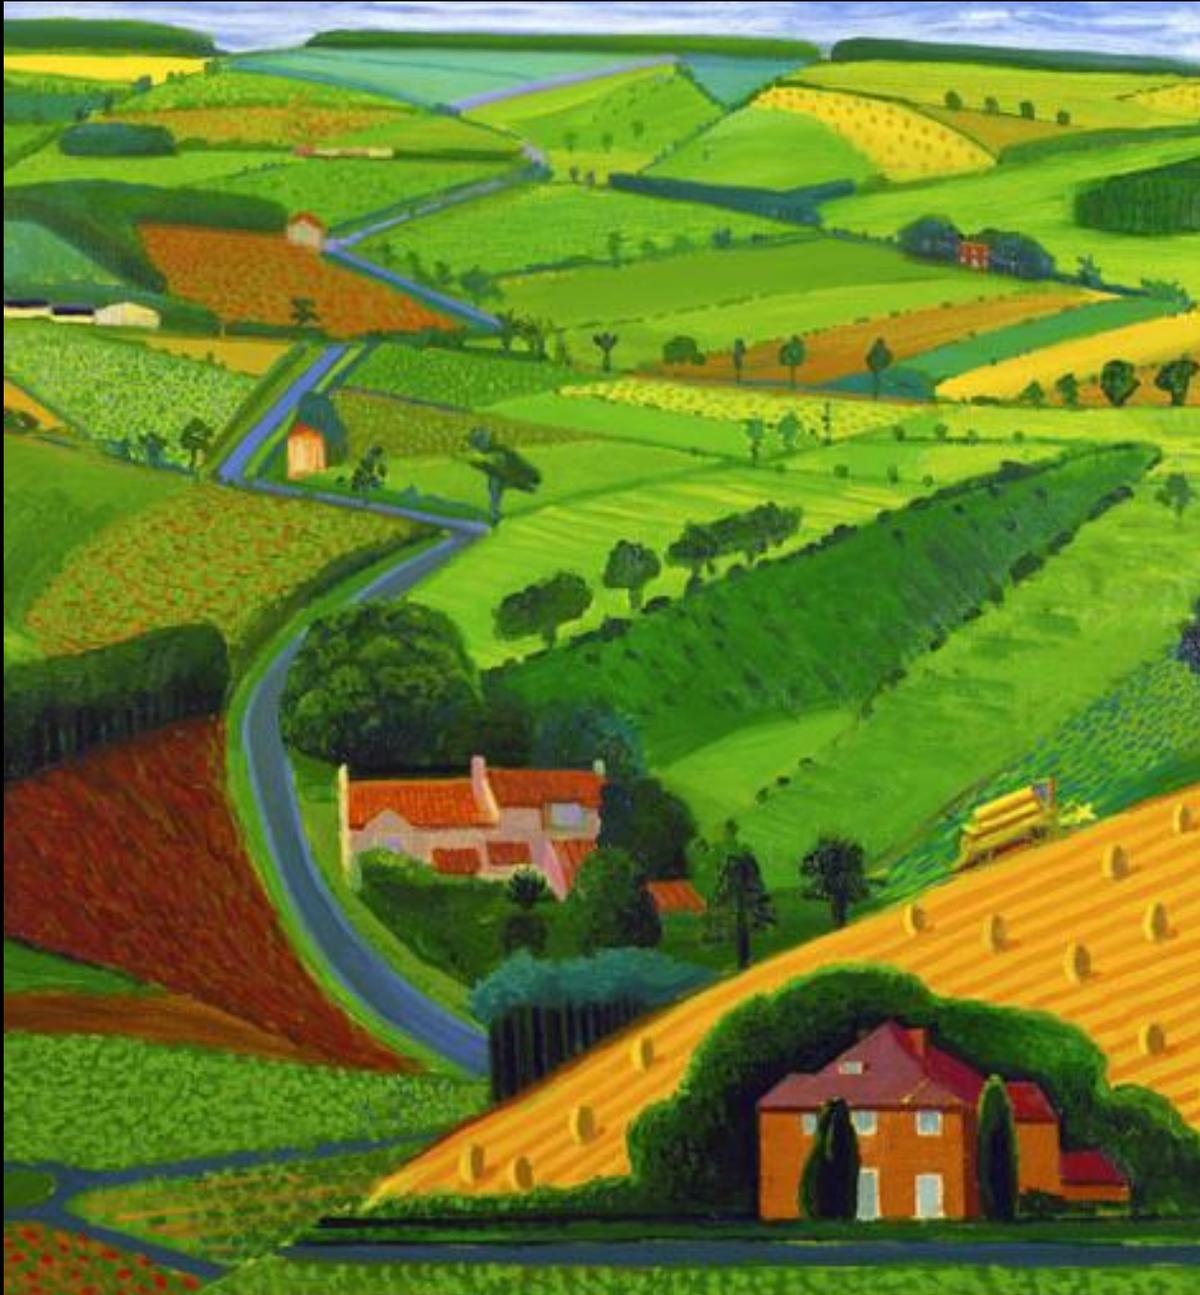

Ask yourself:

*Do I like this piece of work? Why?

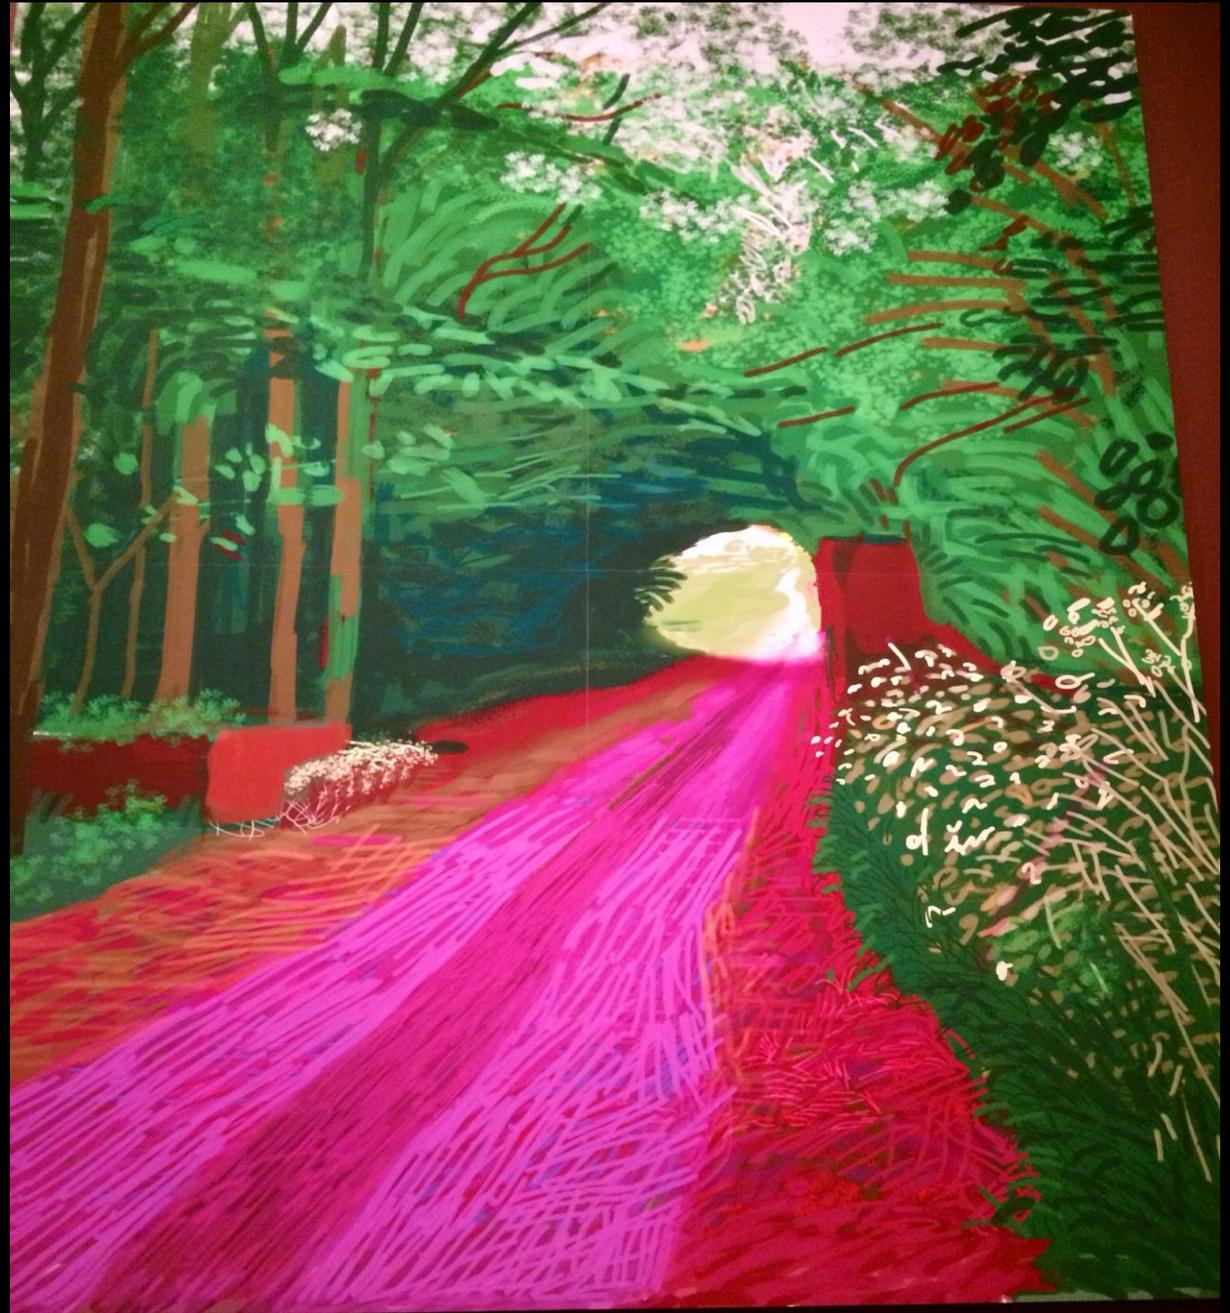

*How was this image created? What medium was
used?

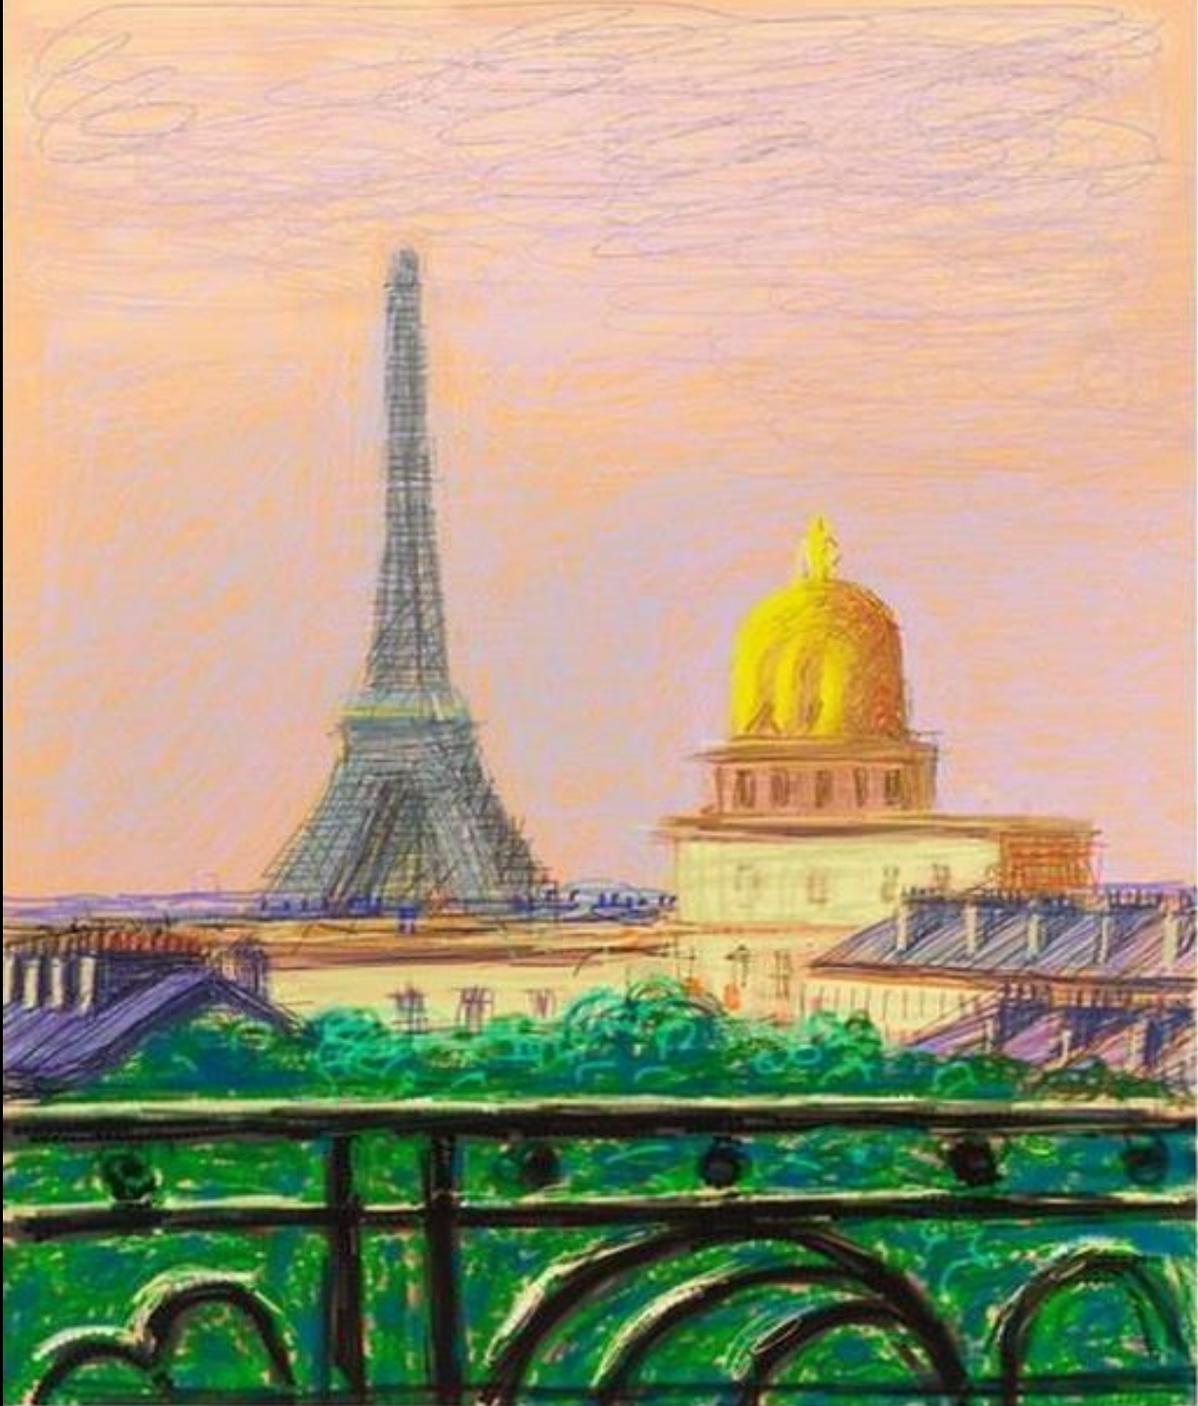

Imagine standing in front of one of his pieces of work
– which are HUGE, how would you feel?

*What sorts of colours are used? Are they realistic?

**HOW DOES
HOCKNEY USE
CONTRASTING
COLOURS IN HIS
WORK?**

**WHAT ABOUT
COMPLIMENTARY
COLOURS?**

What colours are used?
How was this texture created?

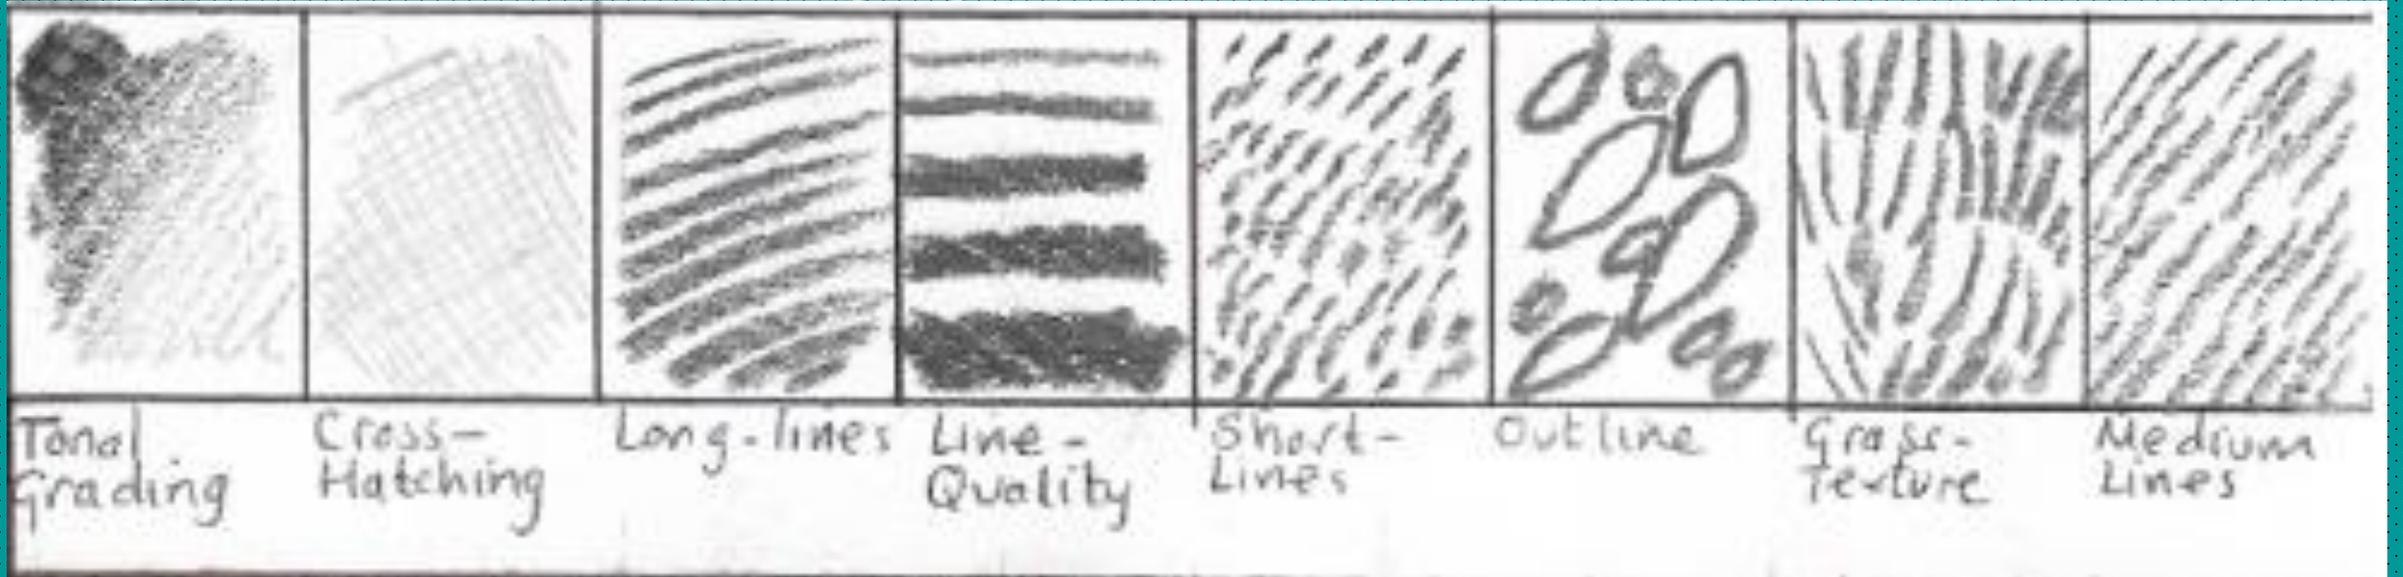

What colours are
used?
How was this texture
created?

What colours are used?
How was this texture created?

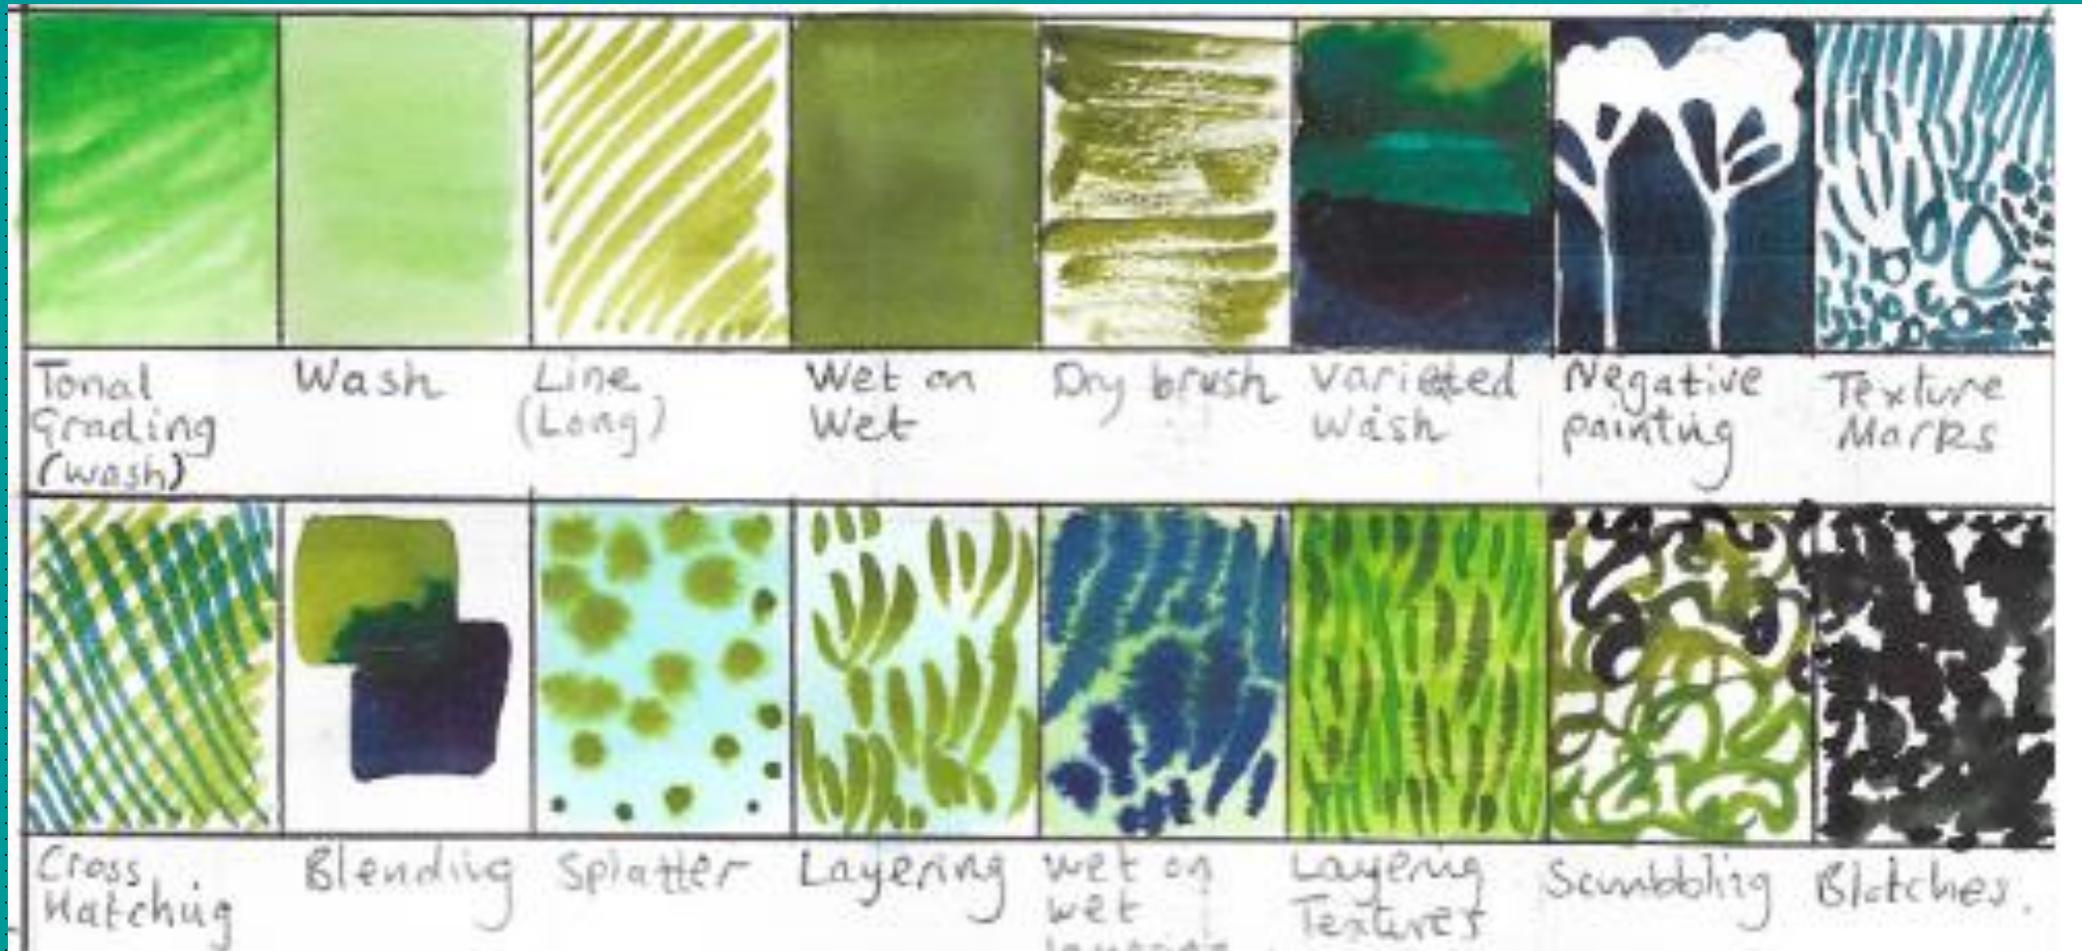

Textures: Using graphite (pencil)

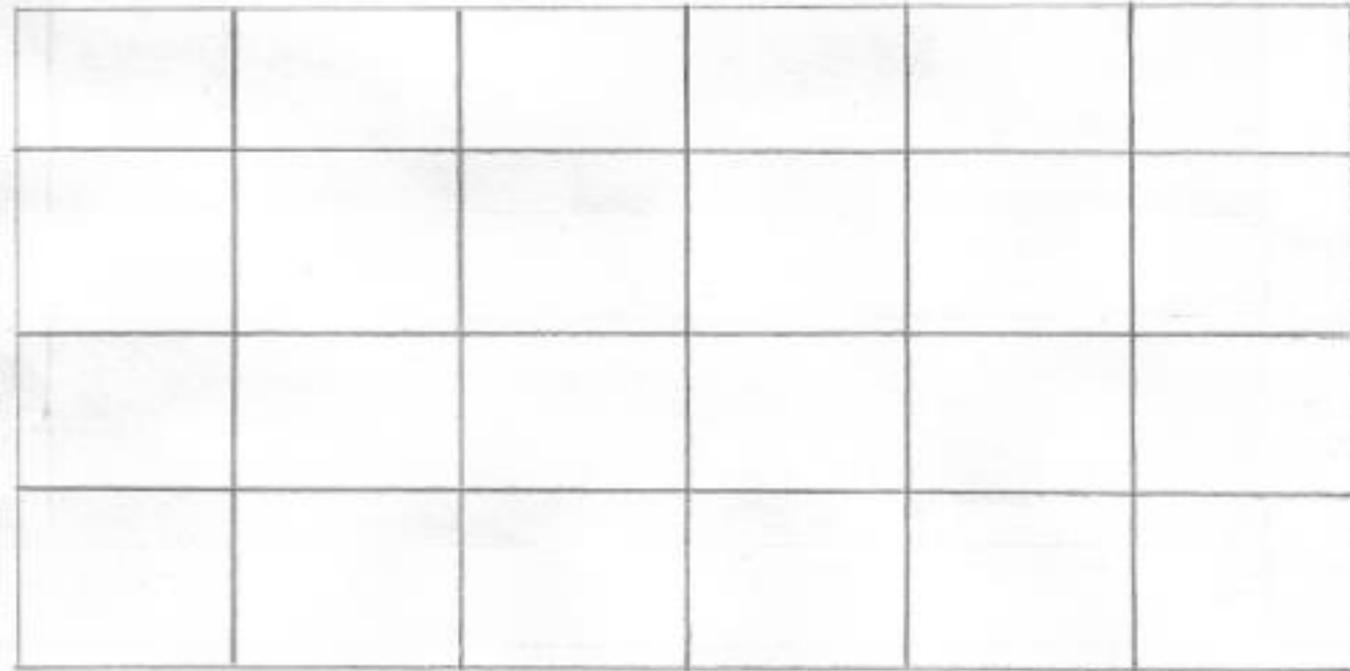

Textures: Using colour pencil

Textures: Using water colour

Task: Select one of the images that we looked at. Create a grid (similar to what you see) over top as well as below the image. If you are not using technology.

Looking carefully, can you re-create each block. Choosing colours and texture carefully.

It is not recommended to use Paint as this will give you very tiny squares on the grid.

On the next slide are some suggestions and guides for using technology.

Remember: anything you use, Use SMART. Ask your parents and carers to help you if you are downloading any apps or if they have a price.

On iphone/ipad:

I recommend that you download Grid# or Drawing Grid: through the Apple store. Then take a picture of one of David's images and select it in the Grid# app.

This will allow you to put grid lines on a picture. Once you have your grid lines and can zoom in and out, you can then focus on one square at a time.

Using a painting app: Paint, (on your computer) or painting apps such as: DoodleArt.

Another app you could use would be Jamboard on your Google Account.

<https://jamboard.google.com/> and sign in with your Google details.

The app: Sketchbook gives you with different styled brushes to use to help give you texture.

You will need to use the image that you have put a grid over to zoom in and out. Looking at the colours and texture used.

If you are using a computer or a laptop, split your screen so you can see two different screens at the same time.

If you are using a tablet, you will need to switch back and forth between the screens.

There is an app: Grid Drawings tool through the apple store for £2.99. You must ask for permission from your parents/ carers before you purchase this. Through this app, you would be able to use a grid to create your re-created image, square by square.

Take a 2 x 2 square of the image and experiment re-creating the colours, lines and textures.

Recreate a section of your selected image

Select different parts of your image to re-create so that you can experiment with the different colours and textures. You will need to know how to create colours and textures next week. 17
